PSYCKES Train the Trainer

We will begin shortly

To hear the webinar, click “Call Me” in the Audio Connection box and enter your phone number - the WebEx system will call your phone

If you do not see the Audio Connection box, go to the top of your WebEx screen, click “Communicate” > “Audio Connection” > “Join Teleconference”

Michelle Hand, MSW
PSYCKES Medical Informatics Team
July 19, 2022

Q&A via WebEx

- All phone lines are muted
- Access “Q&A” box in WebEx menu at the right of your screen; if you expanded the view of the webinar to full screen, hover cursor over green bar at top of screen to see menu
- Type questions using the “Q&A” feature
 - Submit to “all panelists” (default)
 - Please do not use Chat function for Q&A
- Note: slides will be emailed to attendees after the webinar

Goals

- Identify key considerations in planning for training
- Review recommended pre-training activities
- Highlight key information and core competencies (“PSYCKES 101”)
- Review available training resources
- (Not a thorough training on PSYCKES itself)

Planning for PSYCKES Training

- Who needs training?
- What do they need training on?
- What type of training is most appropriate for which staff?
- Understanding workflow expectations and use cases is critical!

Evaluating Training Needs

Role	PSYCKES Use Case	Training Domains
Front Desk Staff at Provider agency	<ul style="list-style-type: none">• Attesting to consent in PSYCKES• Printing PSYCKES Clinical Summary	<ul style="list-style-type: none">• Registrar Tab
Clinicians	<ul style="list-style-type: none">• Review Clinical Summary for clinical decision-making• Attesting to consent in PSYCKES	<ul style="list-style-type: none">• Recipient Search• Clinical Summary
Supervisors	<ul style="list-style-type: none">• Identify at-risk clients• Clinical supervision• Monitor PSYCKES use	<ul style="list-style-type: none">• QI Reports• Recipient Search• Clinical Summary• Usage Reports
QA/QI Staff	<ul style="list-style-type: none">• Review performance on quality measures• Integrate Clinical Summary into UR, incident review	<ul style="list-style-type: none">• QI Reports• Recipient Search• Clinical Summary

Evaluating Training Format

Training Format	Best for ...	Advantages	Challenges
PSYCKES webinars	<ul style="list-style-type: none">• Staff with access to computers• Self-directed learners• Comfortable with computers	<ul style="list-style-type: none">• Offered regularly by PSYCKES staff• Live and recorded format	<ul style="list-style-type: none">• Not specific to users' workflow / use cases• No on-site support
Group training: Demo	<ul style="list-style-type: none">• Larger groups of users• Staff with similar use cases• Comfortable with computers	<ul style="list-style-type: none">• Can tailor to organization's specific workflow	<ul style="list-style-type: none">• Difficult to assess users' capacity to apply training• Scheduling
Group training: Hands-on	<ul style="list-style-type: none">• Larger groups of users• Staff with similar use cases	<ul style="list-style-type: none">• Can tailor to organization• Can offer immediate feedback / assistance	<ul style="list-style-type: none">• Requires access to computer lab• Difficult to engage users with very different skills in same session• Scheduling
1:1 training	<ul style="list-style-type: none">• Staff needing support for computer use	<ul style="list-style-type: none">• Flexible scheduling• User-specific support	<ul style="list-style-type: none">• Trainer time

Preparing for the Training Session

- Develop training outline
 - Internal policies and procedures
 - Consult Core Competencies Checklist
 - Decide whether to use identified or de-identified data
- Practice skills to be taught
 - Attend/view “Introduction to PSYCKES”, “Using the PSYCKES Clinical Summary”, “Consent, Emergency, Quality Flag: PSYCKES Levels of Access” and “Navigating PSYCKES Recipient Search for Population Health” webinars
- Confirm that tokens are activated and tested prior to training
- Have training materials and contact numbers on hand
 - Last page of presentation

Consent Forms

The PSYCKES Consent and Withdrawal of Consent forms are available below in 10 languages. To use these forms, the provider “Facility Name” as well as relevant contact information must be entered in the appropriate blank spaces in the document (fillable PDF). The English and Spanish versions of the PSYCKES Consent form are also available to download within the PSYCKES application in the Registrar Menu, where the “Facility Name” will be automatically populated and contact information can be added or edited.

- **PSYCKES Consent Form:**

[English](#)  [Spanish](#)  [Arabic](#)  [Chinese](#)  [Haitian Creole](#)  [Japanese](#)  [Khmer](#)  [Korean](#)  [Russian](#)  [Urdu](#) 

- **PSYCKES Withdrawal of Consent Form:**

Core Competencies Checklist

User Name: _____

Date: _____

All Users:

User Skill

Required Steps / Answer Key

Login to PSYCKES

Open PSYCKES website; navigate to login screen; enter unique OMH User Identification (ID) and security token passcode.

Exit PSYCKES

Click "Log Off", do not simply close browser.

Clinicians:

User Skill

Required Steps / Answer Key

Search for a client in Recipient Search

Click "Recipient Search" tab; enter Medicaid ID#, Social Security Number (SSN) or Client name. If searching by name, may need to add criteria such as Date of Birth (DOB) to narrow the results. If desired, change "Current Access" filter option; run the search; view/sort the results.

Access a Clinical Summary from search results

Click on client's name.

Set Clinical Summary time period, and read message re: data with special protections

- Explain: What data has special protections? Is it hidden or shown in the summary you are viewing?

Click on desired time period; read message about data with special protections; correctly identify what data has special protections and whether it is shown in the Clinical Summary.

Use Integrated Graph to review services over time, and view desired details

- Does the client appear to be engaged in outpatient MH treatment?

Zoom in on specific time period; hover cursor over dot on graph to see details.

Find desired information in the Clinical Summary

- What quality flags (if any) does client have?
- Where and when was the client's most recent mental health outpatient visit?
- What (if any) are the client's current active medications (behavioral and/or medical)?
- What can you learn about labs and diagnostic testing?

- Be familiar with the sections of the Clinical summary
- Be aware of which sections are broken out into Behavioral Health vs. Medical, and which are integrated
- Understand what the quality flags mean
- Be aware of what information is and is not available (e.g., labs and diagnostic tests are shown, but not results).

Brief Instructions for Using PSYCKES

Includes step-by-step instructions for enabling PHI access, using Recipient Search and Clinical Summary

Using Recipient Search to enter consent and access client data

Steps:

1. Login to PSYCKES and manage access
 - Go to Recipient Search
2. Search for client in the entire PSYCKES database
 - Enter any combination of the recipient identifiers (Medicaid ID, SSN, Name, or DOB) > Click "Search"
3. Confirm recipient match and click "Enable Access" or "Update Access" link on the rightmost column
4. Select reason for having a right to access the client's Medicaid data
 - If the client signed consent, select:
 - Client signed the PSYCKES Consent, BHCC Consent, OR DOH-5055 Adult Health Home Patient Information Sharing Consent
 - In the absence of signed consent, select:
 - This is a clinical emergency
 - Client is currently served by or being transferred to my facility
5. Indicate the way in which the client's identity has been verified and Enable OR Enable and View Clinical Summary
 - Provider attests to client identity
 - Client provided 1 photo ID or 2 forms of non-photo ID

PSYCKES 101: PSYCKES Data

**Office of
Mental Health**

Basic Info about PSYCKES

- A HIPAA-compliant, web-based platform for sharing Medicaid claims data
- Includes up to 5 years of data on Medicaid behavioral health population
 - All Medicaid-reimbursed services across settings
 - Fee-for-service and managed care
 - Clinical data is refreshed weekly
- 60+ quality measures in domains of psychotropic medication, acute care utilization, and outpatient health services
 - Can identify clients at risk or in need of extra support
 - Quality indicators are refreshed monthly

Limitations of PSYCKES Data

- Accuracy dependent on coding and billing
- Data elements limited to what is shown on claims
 - See diagnostic procedures/ labs but without results
- Time lag between services and billing is variable
 - Service data may lag by weeks or months
- Client data affected by hospitalizations (bundled services), loss of Medicaid coverage, moves

Training Take-Away Message

- PSYCKES data can provide important information about treatment history
- May not represent entire clinical picture
- Need to train staff on appropriate ways to handle inconsistencies with client self-report
 - Goal: to support clinician-client dialogue

Client Data for Providers: Comparison

Client data-agency link Type	Client data access type	Quality flag?	Any client data?	Data with special protection? (SUD, HIV, Family Planning, Genetic)	Duration
Automatic	Billed service in past 9 months	No	No, client name only	No	9 months after last service
		Yes	Yes	No	While flag is active, up to 9 months after last service
Manual	Attest client is being served at / transferred to agency	No	No, client name only	No	9 months after last service
		Yes	Yes	No	While flag is active, up to 9 months after last service
	Clinical emergency	n/a	Yes	Yes, all data	72 hours
	Consent	n/a	Yes	Yes, all data	3 years after last service

Training Take-Away Message for Providers

- Data with special protections is only available with provider attestation via the PSYCKES PHI Access Module
- It is important that staff make the effort to obtain signed consent (rather than using emergency access) whenever possible
 - Respect for clients
 - Long-term access to all available client data
- *Note for Managed Care PSYCKES users: client consent is not needed*
 - *All data is available for current and recently disenrolled enrollees*

Client Data for Managed Care Plan Users

Enrollment Status	Quality Flag?	Access to All Client Data, Including Data with Special Protection?	Duration
Currently enrolled in MC Plan	n/a	Yes	Current calendar year, through April in following year
Dis-enrolled from MC Plan this year		Yes	Current calendar year, through April the following year
Dis-enrolled from MC Plan previous year		Yes, through April only	Through April the following year

What's New?

- PSYCKES new features release 7.2.2 went live on August 3, 2021. Updates include: A new AOT Status filter option in Recipient Search to identify clients with “AOT Active or expired within the last 5 years” as well as new Program Type/Service Setting report filters such as Crisis Intervention Services (Mobile Crisis and Telephonic Response and Follow-up), Children and Family Treatment & Support Services, and Children’s Home and Community Based Services. [View Release Notes](#) for more details.
- The new Article 31 Quality Improvement Collaboratives launched in April 2021 – [View the Quality Improvement Collaboratives page](#) for more details. Currently, participating clinics are working towards implementing strategies for sustainable telemental health services.
- The Behavioral Health High Risk Quality Collaborative (HRQC) in Emergency Departments (ED) is currently supporting hospitals in implementing PSYCKES and developing best practices for ED identification and management of patients at risk of suicide, opioid overdose, violence, and high hospital utilization.
- Recent Publication: [The Relationship Between Suicidal Behaviors and Zero Suicide Organizational Best Practices in Outpatient Mental Health Clinics](#)
 - **What we learned:** Layman et al. (2021) found that clinics that followed Zero Suicide organizational best practices with high fidelity were less likely to have a suicide attempt or death among patients under their care, after adjusting for patient census and population type served (adult vs. child). Seven best practices were significantly associated with reduced suicide risk.
 - **Thank you to the 165 clinics that participated in the Suicide Prevention CQI project!**

Logging in to PSYCKES, cont.

- Security Token Required
 - “Hard token” or “Soft token”
 - As of April 2022, default soft tokens are mobile tokens which can only be used on a mobile device
- PIN set at first log-on
 - PIN must contain 8-digits
 - PIN cannot begin with zero
 - PIN cannot have consecutive or sequential numbers (e.g., 11111111, 12341234, 12344321)
 - Cannot reuse one of five recently used PINs

Logging in to PSYCKES, cont.

- At Login Page, enter:
 - User ID
 - Password:
 - Hard token: PIN followed by code on token
 - Soft token: Enter PIN in soft token, copy and past token code into Passcode line on login screen

Be Prepared for Questions About...

- I can't access a client's clinical summary, even though I could last week.
 - The client had a quality flag but no longer does (e.g., changed medication)
 - Emergency access was enabled, but it expired
 - *MC Plan Users*: client may have dis-enrolled from plan
- Why can't I see lab results?
 - Not included on claims / encounter records
- Why does it say "No Medicaid claims available for this data type?"
 - Try expanding the summary period

Training Take-Away Message: Confirm Search Results

- Responsibility as gatekeeper to PHI of over 10 million individuals, including PHI with special protections
- Treatment decisions must be based on correct client information

Step 1: Select Basis for Access to Client's PHI

Why are you allowed to view this data?

The client signed consent

- Client signed a PSYCKES Consent
- Client signed a BHCC Patient Information Sharing Consent
- Client signed a DOH-5055 Health Home Patient Information Sharing Consent

The client did not sign consent

- This is a clinical emergency
- Client is currently served by or being transferred to my facility

Cancel

Next

Office of
Mental Health

Step 1b: If Access is via PSYCKES Consent...

Why are you allowed to view this data?

The client signed consent

- Client signed a PSYCKES Consent
- Client signed a BHCC Patient Information Sharing Consent
- Client signed a DOH-5055 Health Home Patient Information Sharing Consent

- Complete PSYCKES Consent
 - Only the designated form may be used
 - English and Spanish available in the application (other languages available on our “About PSYCKES” webpage)
- Give copy of signed consent form to client
- Original (or scanned version) of consent form is retained in the client’s medical record
- No need to send PSYCKES the consent

PSYCKES Consent Form

Provider/Facility Name

About PSYCKES

The New York State (NYS) Office of Mental Health maintains the Psychiatric Services and Clinical Enhancement System (PSYCKES). This online database stores some of your medical history and other information about your health. It can help your health providers deliver the right care when you need it.

The information in PSYCKES comes from your medical records, the NYS Medicaid database and other sources. Go to www.psyckes.org, and click on About PSYCKES, to learn more about the program and where your data comes from.

This data includes:

- Your name, date of birth, address and other information that identifies you;
- Your health services paid for by Medicaid;
- Your health care history, such as illnesses or injuries treated, test results and medicines;
- Other information you or your health providers enter into the system, such as a Health Safety Plan.

What You Need to Do

Your information is confidential, meaning others need permission to see it. Complete this form now or at any time if you want to give or deny your providers access to your records. What you choose will not affect your right to medical care or health insurance coverage.

Please read the back of this page carefully before checking one of the boxes below. Choose:

- "I GIVE CONSENT" if you want this provider, and their staff involved in your care, to see your PSYCKES information.
- "I DON'T GIVE CONSENT" if you don't want them to see it.

If you don't give consent, there are some times when this provider may be able to see your health information in PSYCKES – or get it from another provider – when state and federal laws and regulations allow it.¹ For example, if Medicaid is concerned about the quality of your health care, your provider may get access to PSYCKES to help them determine if you are getting the right care at the right time.

Ensure that client checks off "I give" or "I deny" consent; otherwise consent is invalid

Your Choice. Please check 1 box only.

I GIVE CONSENT for the provider, and their staff involved in my care, to access my health information in connection with my health care services.

I DON'T GIVE CONSENT for this provider to access my health information, but I understand they may be able to see it when state and federal laws and regulations allow it.

Print Name of Patient

Patient's Date of Birth

Patient's Medicaid ID Number

Signature of Patient or Patient's Legal Representative

Date

Print Name of Legal Representative (if applicable)

Relationship of Legal Representative

Step 2: Verify Client Identity and Submit

How do you know this is the correct person?

Provider attests to client identity

Client provided 1 photo ID or 2 forms of non-photo ID

Identification 1

Identification 2

MAIN STREET CLINIC will be given access to all available data for 3 years (renews automatically with billed service).

[Previous](#)

[Cancel](#)

[Enable](#)

[Enable and View Clinical Summary](#)

- Select 1 forms of photo ID or 2 forms of non-photo ID from drop-down list, or attest to identity without ID
- Cancel, Enable, or Enable and View Clinical Summary

Immediately upon entering consent, any PSYCKES user at the agency can view the client's data.

Be Prepared for Questions About...

- What is an Emergency?
 - Danger to self or others
 - Sudden onset
 - Immediate need for treatment
 - Driven by clinical criteria, not emergency setting
- When can I attest that I know the client's identity?
 - Develop internal procedures for this
 - Document rationale
 - If one ID, keep copy in chart
 - Must be comfortable making clinical decisions based on the information

Bonus Core Competency: Identify Clients w/ QI Flags

Quality Indicators

What is a Quality Indicator/flag?

- PSYCKES identifies clients flagged for quality concern in order to inform the treating provider, network, or care manager and to support clinical review, care coordination, and quality improvement
- User-friendly Statewide Reports and My QI Reports, **updated monthly**, display quality indicator prevalence rates at the statewide, region, county, network, provider, program, managed care plan, and PPS level
- Over 80 quality indicators, such as:
 - No diabetes monitoring for individuals with diabetes and schizophrenia
 - Low medication adherence for individuals with schizophrenia
 - Antidepressant trial of < 12 weeks for individuals with depression
 - High Utilization of Inpatient/Emergency Room, Hospital Readmission, Preventable Hospitalization
 - HARP Enrolled-Not Health Home Enrolled, HARP Enrolled-Not Assessed for HCBS
- The BH QARR - DOH Performance Tracking Measures Indicator Set is a unique indicator set in PSYCKES because it is calculated by the NYS Department of Health (DOH) on "mature" Medicaid data and sent to OMH to display in the PSYCKES application. DOH calculates the QARR Performance Tracking Measures set after a 6-month billing data maturation period to allow for services to be invoiced. The measures are based on a 12-month period of services.

PSYCKES Training Webinars

Title	Description	Register for Live Webinar	View Recorded Version	View Slides
Introduction to the Token Self Service Console	As of April 2022, OMH Security has been directing new users to the Self-Service Console in order to get their RSA tokens. This webinar provides an in-depth review of the Self-Service Console, including: activating your token, setting your PIN and security questions, troubleshooting token issues, resetting your own PIN and requesting replacement tokens.	Wednesday, July 20, 2022 10:00AM – 11:00AM	Will be made available shortly	Will be made available shortly
Introduction to PSYCKES	Overview of what the PSYCKES application is, what clients are accessible in PSYCKES, what data is available, and what quality measures are incorporated. Includes a demonstration of each of the areas of the PSYCKES application: My QI Report, QI Trends Past Year, Recipient Search, the Clinical Summary, and Utilization Reports.	Tuesday, July 12, 2022 11:00AM – 12:00PM	Recording	Slides 
Where to Start: Getting Access to PSYCKES	Overview on how an organization can request access to PSYCKES, how to manage staff-level access at the organization, how to implement the use of PSYCKES, and how to login. Includes a demonstration of the Security Management System (SMS), a web-based system used by Security Managers to grant staff at an organization access to PSYCKES.	Wednesday, August 3, 2022 1:00PM – 2:00PM	Recording	Slides 
Using PSYCKES from Home	This webinar will review information on using PSYCKES from home, such as token setup at home and login instructions, where to get the PSYCKES consent form, obtaining verbal consent for PSYCKES during the state emergency, how to lookup a client in PSYCKES and enter consent, COVID-19 related functions in PSYCKES, and how to access technical support.	Not available live this quarter; Use recording and slides to view webinar	Recording	Slides 

Have you heard about the Self-Service Console?

- The Self-Service Console is a way to manage your RSA token and PIN, for logging into secure OMH applications, including PSYCKES
- The console is accessed at: mytoken.ny.gov
- From within your Self-Service Console account, you can:
 - Set security questions
 - Reset your PINs
 - Activate tokens
 - Request a replacement token
- We recommend all users set up security questions in the console so that you can reset your own PIN if ever needed
- As of April 2022, the console must be used when new users need a token or existing users need a replacement token
