

### HARP HCBS Rate Codes

These are the codes that the HARP plans and HSNPs will be using to bill Medicaid for HCBS services that are provided to HARP enrollees (or HSNP enrolled HARP-eligibles). The providers will provide the HCBS service and bill the Plan at the HCBS fee schedule amount (using all appropriate Px codes and modifiers – as outlined in the HCBS fee schedule). Then the Plan will pay the provider and also bill to eMedNY for the HCBS service under the appropriate HCBS rate code (using all appropriate Px codes and modifiers). This type of billing would be analogous to that of a maternity kick, but would be much more frequent. The Plans will report these services to MEDS using the HCBS rate code (instead of a specialty code). The MEDS system is currently being modified to accept rate code. The field used for rate code is the value code field in the header of the claim. Plans now report to MEDS the value code that indicates a low birth weight baby followed by the weight of the baby, so Plans are already somewhat familiar with this field and its use in MEDS.

The fee levels that were recently issued have not been approved by CMS, though we anticipate any changes to the fee levels to be minimal. However, due to complicated CMS rules on cost sharing and the Medicaid expansion, the possibility exists that Plans will be not be allowed to receive their HCBS admin fee under the HCBS rate codes (as was originally proposed and as is shown in the fee schedule that was issued), in which case Plans will be billing for the HCBS fee shown on the fee schedule that excludes HCBS admin (i.e., the same fee they are paying the providers). Then, the Plans will bill for the HCBS admin under its own monthly capitation rate code (probably 7581 and another rate code for HSNPs), which rate code will supplement the HARP capitation rate that will be billed under rate code 7580. As soon as we know the final answer we will pass that information along to all Plans.
