

NYS Behavioral Health (BH) Home and Community Based Services (HCBS) Dashboard: County Level Data

The below references information found in the Data table entitled “HCBS Access Data by County Fiscal Responsibility”

This data set provides a snapshot of the number of individuals who have completed significant steps toward utilizing NYS Adult Behavioral Health (BH) Home and Community Based Services (HCBS). The data is breakout by County and updated on a quarterly basis.

All data is unique recipient data meaning that Individuals are counted only once.

Column Number	Title/ Data Set	Source	Data Set Description	Notes
1	Transaction District		Name of County	All counties with census population less than 20,000 are grouped to avoid HIPAA concern.
2	HARP Eligible	Medicaid Data Warehouse (MDW)	Number of individuals by county with a HARP eligibility code (H code) and enrolled in HARP, HIV/SNP or Mainstream at the time of the data run*.	Does not include Individuals who have H code but not enrolled in HARP, HIV/SNP or Mainstream. *By excluding all other plan types, such as LTC, we removed the recipients who will not be enrolled even if they have H code.
3	HARP Enrolled	Medicaid Data Warehouse (MDW)	Number of individuals by county who have a HARP eligibility code (H code) and enrolled in HARP or HIV/SNP.	Data captures the number of HARP enrollees with HARP premiums paid to NYS Medicaid Managed Care Organizations. Does not include Individuals who remain in the HARP but lost all H code(s).
4	Health Home Enrolled	Medicaid Data Warehouse (MDW)	Number of individuals by county both enrolled in a HARP and enrolled in a Health Home (HH). Does not include HARP-enrolled individuals currently being outreached by a HH.	In contrast, Health Home enrollment data from the MAPP dashboard includes HH-enrolled and HH- outreached individuals.
5	HCBS Assessed in Past 12 Months	CMHA/UAS	Number of individuals by county who have a H code and have completed the NYS Eligibility Assessment for Behavioral Health (BH) Home and Community Based Services (BH HCBS) within last 12 months.	BH HCBS assessment data has approximately a one-week lag. This data set captures the number of individuals who have completed one or more assessments, but not the number of total assessments received by the UAS.
6	Recipients Received HCBS in Past 12 Months	Medicaid Data Warehouse (MDW)	Number of individuals by county who have received BH HCBS as determined by having at least one paid BH HCBS service claims within last 12 months (without claim-lag). Individuals with multiple service claims are only counted once.	BH HCBS assessment claims and provider travel supplemental claims are not included in this data set. The months that still impacted by claim-lag are excluded. For example, the report updated at May 2020 includes all recipients who has at least one service claim paid during Feb 2019-Jan 2020.

HCBS Access Data by County Fiscal Responsibility as of Jun. 03, 2020

Note: All counties with census population less than 20,000 are grouped to avoid HIPAA concern.

All metrics in this table are count of unique recipients.

HARP Eligible column include all recipients who have active H code as of 06/03/2020 and enrolled in Mainstream, HARP or HIVSNP. HCBS Assessed in Past 12 Months

(Column G) only includes assessed population enrolled in HARP or HIV SNP.
