

Mid Hudson Forensic PC
Regional Advisory Committee Input
April 1, 2013

1. What should these health plans consider as they coordinate transitioning forensic clients into the community?
 - a. Pamphlets giving information about what is available
 - b. Consider how many times someone has been back and forth in the forensic system
 - c. Vocational training while still in forensics
 - d. Given people in forensics usually go into civil before the community, enhance transition planning at civil hospitals
 - e. Forming a way to take advantage of program before transitioning over to civil
 - f. Proper coverage to ensure medication continuing without lapse or gap
 - g. Family support and involvement (informing families about program and having them involved in process)
 - h. More preparation for forensic clients before transitioning over to civil regarding this and other areas
