Length of Service

All units of our organization collaborate to ensure that each individual's recovery is supported to the fullest extent possible. Each service area has a "non decline" policy, which means that individuals can easily move from one service area to another.

The Inpatient Service offers an intermediate level of care of six months or less.

Obtaining Services

Buffalo Psychiatric Center's Inpatient Service accepts referrals from the psychiatric units at the general hospitals in our service area.

Individuals discharged from our inpatient services who require an additional brief hospitalization may be directly re-admitted.

The Inpatient Admissions Office may be contacted at: 816-2172.

Services at our outpatient recovery and treatment center (clinic) locations may be requested by contacting Central Intake: (716) 816-2218

Confidentiality

All personal information about recipients is considered privileged and confidential. We abide by all federal HIPAA regulations.

Staffing

A multi-disciplinary staffing pattern promotes a holistic approach to treatment.

Our vision:

- create opportunities for personal growth, choice, and recovery
- foster hope and respect
- provide safe environments
- promote excellence
- encourage partnerships among recipients, families, and providers
