

## PSYCKES Release Notes – Release 7.2.2

### AOT Active or Expired Within the Last 5 Years

A new filter option within the “AOT Status” filter in recipient search was added called “AOT Active or Expired within the last 5 years.” The data source for this filter is the OMH Tracking for AOT Cases and Treatment (TACT) database and can be used to identify clients served by your organization who currently or previously within the last 5 years have an Assisted Outpatient Treatment order.

### Service Setting Filters in My QI Report, Recipient Search, & Clinical Summary

The following new report filters have been added in the “Program Type” filters in My QI Report, the “Service Setting” filters in Recipient Search, and the applicable services sections in the client-level Clinical Summary:
