September 2014 Monthly Report:

OMH facility performance metrics and community service investments

Report Overview:

This report is issued pursuant to the State Fiscal Year 2014-15 Budget agreement which requires that "The commissioner of mental health shall provide monthly status reports of the 2014-15 community investments and the impact on inpatient census to Chairs of the Senate and Assembly fiscal committees. Such report shall include state operated psychiatric facility census, admissions and discharges; rate of Medicaid psychiatric inpatient readmissions to any hospital within thirty days of discharge; Medicaid emergency room psychiatric visits; and descriptions of 2014-15 new community service investments. Such report shall include an explanation of any material census reductions, when known to the facility."

This report is comprised of several components:

- 1. State Psychiatric Center (PC) descriptive metrics;
- 2. Description and status of community service investments;
- 3. Psychiatric readmissions to hospitals and emergency rooms for State PC discharges;
- 4. Psychiatric readmissions to hospitals and emergency rooms for Article 28 and Article 31 hospital psychiatric unit discharges.

Statewide Overview of Service Expansion:

Supported Housing capacity expansion issued through State Aid Letters in April continued developing and serving new individuals in September. Supported Housing providers on Long Island were notified of their awards for a total of 100 beds during September, and can begin serving new individuals.

The second round of HCBS expansion slots released in April and awarded to providers in June continued serving more new individuals across the State.

State-operated mobile services are operating in three regions of the State, as outlined in the accompanying tables, with expansions continuing through the allocation of additional staff. OMH continues the preparation of space for campus-based crisis/respite beds, and capacity is expected to become operational in the coming months pursuant to the terms of the 2014-15 State Budget agreement. Most notably, the Hutchings PC crisis/respite unit completed its licensing process and will begin operation in early November.

Four Aid to Localities reinvestment plans have now been approved by OMH and State Aid Letter amendments have been issued to local governmental units in Western NY/Buffalo area, Rochester area, Lower Hudson River region, and Long Island. Four additional Aid to Localities reinvestment plans have been submitted to OMH and are under review: North Country, Southern Tier, Syracuse area, and New York City.

Updated as of Oct 10, 2014

- 1. Research units and Sexual Offender Treatment Programs (SOTP) were excluded.
- 2. Discharge includes discharges to the community and transfers to another State IP facility.
- 3. Monthly Avg Daily Census defined as: Total number of inpatient service days for a month divided by the total number of days in the month.
- 4. NYC Children's Center and Rockland CPC reduced budgeted capacity by one unit each in September. Capacity reductions comply with requirement that there be a consistent ninety day period of time that the beds remain vacant, as demonstrated by the July-September census data.

- 1. Regions were categorized to match areas described in information sheets provided to the Legislature on April 8, 2014 and posted on OMH website.

 2. Supported housing and waiver allocations were determined in consultation with, and distributed to counties in April. County allocations of these resources, are outlined in the accompanying tables.
- 3. Services developed in consultation with local stakeholders and based on regional advisory committee recommendations.

Updated as of October 1, 2014

- 1. Research units and Sexual Offender Treatment Programs (SOTP) were excluded.
- 2. The denominator for this measure was based on State inpatient discharges to the community. The discharge cohort has a 6-month lag to allow time for completion of Medicaid claim submissions.
- 3. Readmissions were defined as State PC and Medicaid (Article 28 /31) psychiatric inpatient readmission events ocurring within 1 to 30 days after the State PC discharge. The first readmission within the 30 day window was counted.
- 4. ER utilization was identified using Medicaid claims and encounters only. The State PC discharge cohort was required to have a minimum of 25 days of Medicaid eligiblity post discharge to be included in the denominator of the metric. The numerator included the first Psychiatric ER/CPEP event that occurred within thirty days post discharge.
- *Note this rate may not be stable due to small denominator (less than 10 discharges in the denominator).

Table 5: General and Private Hospital 30-Day Inpatient Readmission and ER Utilization Rates 1 Readmission⁴ ER Utilization⁶ For discharge cohort (Dec, 2013-Feb, For discharge cohort (Dec, 2013-2014), % Having Psychiatric Feb, 2014), % Utilizing Psychiatric Capacity (as of 9/1/14) Readmission within 30 days **Emergency Room within 30 days** County² Hospital Name³ Adult⁵ Region Auspice Total Adults Child Total Child Total Adult Child Broome 56 56 10.5% 10.5% 6.7% Central United Health Services Hospitals, Inc. Updated as of October 1, 2014 Source: Concerts, Medicaid, MHARS

Notes:

- 1. Private (Article 31) hospitals are classified as Institutes for Mental Diseases (IMD), and as such, are not reimbursed by Medicaid for inpatient treatment in their facilities for persons aged 22-64.
- 2. Data are presented by county of discharging hospital location and age group (child or adult). If an entity operates more than one hospital and county is
- 3. Hospitals that closed prior to 9/1/2014 are excluded.
- 4. The denominator for this measure was based on discharges to the community. The discharge cohort has a 6-month lag to allow time for completion of Medicaid claim submissions. Readmissions were defined as State PC and Medicaid psychiatric (Article 28 /31) inpatient events ocurring within 1 to 30
- 5. When the psychiatric unit is a child or adolescent unit, persons aged 21 or younger are counted as a child. For adult units, persons aged 16 or older are counted as adults.
- 6. ER data were extracted from Medicaid claims and encounters only. The discharge cohort was required to have a minimum of 25 days of Medicaid eligiblity post discharge to be included in the calculation. The numerator included the first Psychiatric ER/CPEP event that occurred within thirty days
- 7. Westchester Medical /Mid-Hudson Division was St Francis Hospital in previous reports as St Francis Hospital had its beds legally taken over by Westchester Medical Center as of 5/9/2014
- 8. Northeast Health Samaritan Hospital was named as Samaritan Hospital in reports prior to July report
- 9. Nyack Hospital legally took over the beds of Summit Park Hospital as of 4/22/2014.
- 10. University Hospital of Brooklyn closed the SUNY Downstate LICH Inpatient Program on 5/22/2014 but the official approval did not come through until 9/30/2014.

*Note: This rate may not be stable due to small denominator (less than 10 discharges in the denominator).

GLOSSARY OF SERVICES

1. Supported Housing: Supported Housing is a category of community-based housing that is designed to ensure that individuals who are seriously and persistently mentally ill (SPMI) may exercise their right to choose where they are going to live, taking into consideration the recipient's functional skills, the range of affordable housing options available in the area under consideration, and the type and extent of services and resources that recipients require to maintain their residence with the community. Supported Housing is not as much considered a "program" which is designed to develop a specific number of beds; but rather, it is an approach to creating housing opportunities for people through the development of a range of housing options, community support services, rental stipends, and recipient specific advocacy and brokering. As such, this model encompasses community support and psychiatric rehabilitation approaches.

The unifying principle of Supported Housing is that individual options in choosing preferred long term housing must be enhanced through:

- Increasing the number of affordable options available to recipients;
- Ensuring the provision of community supports necessary to assist recipients in succeeding in their preferred housing and to meaningfully integrate recipients into the community; and
- Separating housing from support services by assisting the resident to remain in the housing of his choice while the type and intensity of services vary to meet the changing needs of the individual.
- 2. Home and Community Based Services Waiver (HCBS): HCBS was developed as a response to experience and learning gained from other state and national grant initiatives. The goals of the HCBS waiver are to:
 - Enable children to remain at home, and/or in the community, thus decreasing institutional placement.
 - Use the Individualized Care approach to service planning, delivery and evaluation. This
 approach is based on a full partnership between family members and service providers.
 Service plans focus upon the unique needs of each child and builds upon the strengths of
 the family unit.
 - Expand funding and service options currently available to children and adolescents with a diagnosis of serious emotional disturbance and their families.
 - Provide services that promote better outcomes and are cost-effective.

The target population of children eligible for the waiver are children with a diagnosis of serious emotional disturbance who without access to the waiver would be in psychiatric institutional placement. Parent income and resources are not considered in determining a child's eligibility.

The HCBS waiver includes six new services not otherwise available in Medicaid:

- Individualized Care Coordination includes the components of intake and screening, assessment of needs, service plan development, linking, advocacy, monitoring and consultation.
- Crisis Response Services are activities aimed at stabilizing occurrences of child/family crisis where it arises.

- **Intensive In-home Services** are ongoing activities aimed at providing intensive interventions in the home when a crisis response service is not enough.
- **Respite Care** are activities that provide a needed break for the family and the child to ease the stress at home and improve family harmony.
- Family Support Services are activities designed to enhance the ability of the child to
 function as part of a family unit and to increase the family's ability to care for the child in
 the home and in community based settings.
- Skill Building Services are activities designed to assist the child in acquiring, developing and addressing functional skills and support, both social and environmental.
- 3. Mobile Integration Teams (MIT): The mobile teams will provide the clinical intervention and support necessary to successfully maintain each person in his or her home or community. The goal is to provide the level of clinical care, community based support, and supervision in the home and community setting that is needed to maintain community tenure. The teams will provide an array of services delivered by a multidisciplinary team of professionals and paraprofessionals. Services will address the individualized emotional, behavioral and mental health needs of the recipients and their families. The team will provide services designed to enhance the existing system of care, fill in service gaps, and/or related activities that are preventative of an individual requiring psychiatric hospitalization.

The goals of these services are to:

- Support efforts to maintain the person in his or her natural environment.
- Provide immediate access to treatment services designed to stabilize crisis situations.
- Reduce environmental and social stressors.
- Effectively reduce demand on emergency departments and inpatient hospital services.

Services Provided

The following are service possibilities that may be provided by a team, depending upon the needs of the recipient and community:

- (1) Health Teaching includes medication self-administration, chronic physical illness symptom management, smoking cessation, nutrition and elimination, hygiene, healthy choices and importance of exercise.
- (2) Health Assessment will include the assessment of vital signs, skin turgor, elimination status, basic neurological status, metabolic syndrome monitoring to determine need for follow up by physician or pharmacy, substance abuse.
- (3) Skill Building provides support to be successful in the home, community and school/work by teaching living skills and problem solving, including budgeting, shopping, meal preparation and travel training. Social, remediation, recreational and occupational skills will be addressed associated with level of functioning. Includes educating people regarding their diagnosis, medications and symptom management.
- (4) **Psychiatric Rehabilitation and Recovery** includes coaching to create meaningful life outside the hospital by developing existing strengths and abilities that support a valued

- role in the community. Also includes exploring vocational, educational and personal interest opportunities and resources to create an individualized, purposeful structure in the day.
- (5) **Peer Support Groups & Skills Training** includes support and informational meetings that will make introduction to the treatment process, model self-advocacy skills, assist in identifying community support systems and developing WRAP plans.
- (6) Crisis Assessment & Intervention involves assessment, intervention and follow up for a person experiencing an emotional or behavioral crisis on location in the community, including safety plan development and implementation.
- (7) **Collaboration with legal system** includes interfacing with law enforcement to assist with linkage to most appropriate care, including crisis response and engagement.
- (8) Outreach and Engagement provides initial contact to connect with service provider and facilitate first appointment for people never engaged in services, people in the community who need to reconnect and people transitioning from inpatient.
- (9) Collaboration with ER Staff provides support in ER settings to avoid unnecessary hospitalizations.
- (10)**Physical Health Care** provides personal care to include ADL support, wound care and catheter care, etc.
- (11) **Crisis Respite** offers in-home short-term care and intervention strategy for children and their families as a result of a behavioral health crisis event that creates an imminent risk for an escalation of symptoms without supports and/or a loss of functioning.
- (12) **Planned Respite** provides in-home planned short-term relief for family/caregivers that are needed to enhance the family/caregiver's ability to support the child's disability and/or health care issues.
- (13) **Consultation & Information** provides telephone consultation and information is available to the recipient and support person when experiencing an emotional and/or behavioral crisis.
- (14)Behavioral Support and Consultation are services delivered directly to school staff to avoid the use of 911, and establishment of partnerships with stakeholders to provide assessments.
- (15)Facilitation of Community Supports and Care are services that will work to establish an effective continuing plan for support of the entire caregiving system-family, school, probation and service providers. Linking the recipient, family and support person, where appropriate, to the community service system and coordinating the provision of services with the objective of continuity of care and service.
- (16)**Primary Care Consultations & Access to Tele-Psychiatry** creates capability for more immediate access to psychiatric services to respond to crisis/acute needs; consultation services; decision support for primary care physicians, integration with

- urgent care centers, ongoing support to patients/families, schools, as well as community providers.
- (17)**Brief Therapeutic Support** includes short term therapeutic communication and interaction for the purposes of alleviating symptoms of dysfunction associated with an individual's diagnosed mental illness or emotional disturbance.
- (18) Family and Caregiver Support and Skills Building delivered to families and caregivers by Family Peer Advocates, Peer Specialists or Clinicians in a group format or individually to address the symptom-related problems that interfere with the child/adolescent's functioning and supports the care givers in coping and managing with the child/adolescent's emotional disturbance. This includes instruction on parenting skills that focus on techniques to help parents deal with problem behaviors, and reinforce pro-social behaviors in the home, school and community. Parents will learn, discuss and practice positive parenting strategies.
- 4. Respite Services: Temporary services (not beds) provided by trained staff in the consumer's place of residence or other temporary housing arrangement. Includes custodial care for a disabled person in order that primary care givers (family or legal guardian) may have relief from care responsibilities. The purpose of respite services is to provide relief to the primary care provider, allow situations to stabilize and prevent hospitalizations and/or longer term placements out of the home. Maximum Respite Care services per Consumer per year are 14 days.
- 5. Outreach: Outreach programs/services are intended to engage and/or assess individuals potentially in need of mental health services. Outreach programs/services are not crisis services. Examples of applicable services are socialization, recreation, light meals, and provision of information about mental health and social services. Another type of service within this program code includes off-site, community based assessment and screening services. These services can be provided at forensic sites, a consumer's home, other residential settings, including homeless shelters, and the streets.
- 6. Assertive Community Treatment (ACT) Program: ACT Teams provide mobile intensive treatment and support to people with psychiatric disabilities. The focus is on the improvement of an individual's quality of life in the community and reducing the need for inpatient care, by providing intense community-based treatment services by an interdisciplinary team of mental health professionals. Building on the successful components of the Intensive Case Management (ICM) program, the ACT program has low staff-outpatient ratios; 24-hour-a-day, seven-day-perweek availability; enrollment of consumers, and flexible service dollars. Treatment is focused on individuals who have been unsuccessful in traditional forms of treatment.
- 7. Advocacy/Support Services: Advocacy/support services may be individual advocacy or systems advocacy (or a combination of both). Examples are warm lines, hot lines, teaching daily living skills, providing representative payee services, and training in any aspect of mental health services. Individual advocacy assists consumers in protecting and promoting their rights, resolving complaints and grievances, and accessing services and supports of their choice. Systems advocacy represent the concerns of a class of consumers by identifying patterns of problems and complaints and working with program or system administrators to resolve or eliminate these problems on a systemic, rather than individual basis.

8. Targeted Case Management:

The Targeted Case Management (TCM) program promotes optimal health and wellness for adults diagnosed with severe mental illness, and children and youth diagnosed with severe emotional disorders. Wellness and recovery goals are attained by implementing a personcentered approach to service delivery and ensuring linkages to and coordination of essential community resources. With respect for and affirmation of recipients' personal choices, case managers foster hope where there was little before. Case Managers work in partnership with recipients to advance the process of individuals gaining control over their lives and expanding opportunities for engagement in their communities. All targeted case management programs are organized around goals aimed at providing access to services that encourage people to resolve problems that interfere with their attainment or maintenance of independence or self-sufficiency, and maintain themselves in the community rather than an institution.

Case managers:

- Promote hope and recovery by using strengths-based, culturally appropriate, and personcentered practices
- Maximize community integration and normalization
- Provide leadership in ensuring the coordination of resources for individuals eligible for mental health services
- 9. Intensive Case Management (ICM): In addition to providing the services in the general Targeted Case Management program description above, ICM is set at a case manager/client ratio of 1:12. Medicaid billing requirements for the Traditional ICM model requires a minimum of four (4) 15 minute face to-face contacts per individual per month. For programs serving Children and Families, one contact may be collateral. The Flexible ICM model requires a minimum of two (2) 15 minute minimum face-to-face contacts per individual, per month but must maintain a minimum aggregate of 4 face-to-face contacts over the entire caseload. For programs serving Children and Families, 25% of the aggregate contacts can be collaterals.

*Note: Targeted Case Management and Intensive Case Management programs for adults have been converted to Health Home care management. Children will continue to be served under the ICM program until the conversion to Health Home in 2015.

- 10. Crisis Intervention: Crisis intervention services, applicable to adults, children and adolescents, are intended to reduce acute symptoms and restore individuals to pre-crisis levels of functioning. Examples of where these services may be provided include emergency rooms and residential settings. Provision of services may also be provided by a mobile treatment team, generally at a consumer's residence or other natural setting (not at an in-patient or outpatient treatment setting). Examples of services are screening, assessment, stabilization, triage, and/or referral to an appropriate program or programs. This program type does not include warm lines or hot lines.
- 11. Non-Medicaid Care Coordination: Activities aimed at linking the consumer to the service system and at coordinating the various services in order to achieve a successful outcome. The objective of care coordination in a mental health system is continuity of care and service. Services may include linking, monitoring and case-specific advocacy. Care Coordination Services are provided to enrolled consumers for whom staff is assigned a continuing care coordination responsibility. Thus, routine referral would not be included unless the staff member making the referral retains a continuing active responsibility for the consumer throughout the system of service. Persons with Medicaid may receive services from this program, however the program does not receive reimbursement from Medicaid.
- **12. Recovery Center:** A program of peer support activities that are designed to help individuals with psychiatric diagnosis live, work and fully participate in communities. These activities are based on

the principle that people who share a common condition or experience can be of substantial assistance to each other. Specific program activities will: build on existing best practices in self-help/peer support/mutual support; incorporate the principles of Olmstead; assist individuals in identifying, remembering or discovering their own passions in life; serve as a clearinghouse of community participation opportunities; and then support individuals in linking to those community groups, organizations, networks or places that will nurture and feed an individual's passions in life. Social recreation events with a focus on community participation opportunities will be the basis for exposing individuals to potential passion areas through dynamic experiences, not lectures or presentations.

- 13. Self Help Program: To provide rehabilitative and support activities based on the principle that people who share a common condition or experience can be of substantial assistance to each other. These programs may take the form of mutual support groups and networks, or they may be more formal self-help organizations that offer specific educational, recreational, social or other program opportunities.
- 14. Clinic Treatment: A clinic treatment program shall provide treatment designed to minimize the symptoms and adverse effects of illness, maximize wellness, and promote recovery. A clinic treatment program for adults shall provide the following services: outreach, initial assessment (including health screening), psychiatric assessment, crisis intervention, injectable psychotropic medication administration (for clinics serving adults), psychotropic medication treatment, psychotherapy services, family/collateral psychotherapy, group psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, psychological testing, health physicals, health monitoring, and psychiatric consultation. A clinic treatment program for children shall provide the following services: outreach, initial assessment (including health screening), psychiatric assessment, crisis intervention, psychotropic medication treatment, psychotherapy services, family/collateral psychotherapy, group psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, psychological testing, health physicals, health monitoring, psychiatric consultation, and injectable psychotropic medication administration.
- 15. Home-Based Crisis Intervention: The Home-Based Crisis Intervention Program is a clinically oriented program with support services by a MSW or Psychiatric Consultant which assists families with children in crisis by providing an alternative to hospitalization. Families are helped through crisis with intense interventions and the teaching of new effective parenting skills. The overall goal of the program is to provide short-term, intensive in-home crisis intervention services to a family in crisis due to the imminent risk of their child being admitted to a psychiatric hospital. The target population for the HBCI Program is families with a child or adolescent ages 5 to 17 years of age, who are experiencing a psychiatric crisis so severe that unless immediate, effective intervention is provided, the child will be removed from the home and admitted to a psychiatric hospital. Families referred to the program are expected to come from psychiatric emergency services.
- **16.** Crisis Housing/Beds (Adult): Non-licensed residential program, or dedicated beds in a licensed program, which provide consumers a homelike environment with room, board and supervision in cases where individuals must be removed temporarily from their usual residence.
- 17. Children & Youth Crisis/Respite: The intent of the crisis/respite program is to provide a short-term, trauma-sensitive, safe and therapeutic living environment, and crisis support to children and adolescents with serious emotional disturbances, their families and residential service providers.

The goal of the program is to:

- Stabilize the crisis situation and support the family or service provider's efforts to maintain the child in his or her current residence:
- Provide immediate access to treatment services;
- Increase engagement with peer and family support services;
- Improve the family/caregiver's ability to respond to the environmental/social stressors that precipitated the need for respite; and
- Decrease the inappropriate use of emergency departments, inpatient hospitalizations and/or other out-of-home placements.

This program is intended to be an opportunity to provide intense support and guidance to the youth and their family/caregivers so as to prevent a reoccurrence of the situation preceding the admission.

Eligibility

Depending upon the facility and/or location of the program, the population to be served may include youth from five to eighteen years of age, with admission happening prior to the youth's eighteenth birthday.

A crisis admission to the crisis/respite unit may occur when there is evidence of situational crisis requiring temporary residential placement for assessment and treatment planning due to one or more of the following:

- A situational crisis occurred disturbing the adolescent's ability to cope;
- Substantial problems in social functioning due to a serious emotional disturbance within the past year;
- Serious problems in family relationships, peer/social interaction or school performance;
- Serious and persistent symptoms of cognitive, affective and personality disorders.

A planned respite admission will occur for youth in active mental health treatment, whose service providers believe that planned time away for the living situation would significantly relieve stress and allow time for parents and providers to re-strategize, which in turn will keep youth out of hospitals and long term residential placements.

Services Provided

The following services will be provided and/or coordinated through the crisis/respite program:

- (1) **Crisis Stabilization** is intended to address the situation that precipitated the youth's admission to the program.
- (2) **Behavior support** services will provide guidance and training in behavior intervention techniques and opportunities to practice those skills to increase the youth's ability to manage their behavior. These interventions will be primarily focused in the areas that were the catalyst for the youth's admission.
- (3) Case management services will be provided, if appropriate. If the youth and family are already connected to case management services (SCM, ICM, Waiver), this service will continue to be provided by the involved provider. If the youth/family is not connected to case management services, a referral for such services will be submitted, where appropriate.
- (4) **Counseling services** will be provided with a focus on clarifying future direction, developing meaningful goals, identifying personal strengths, identifying mental health-related behaviors or feelings that assist or interfere with the achievement of goals, and re-integrating into the community.

- (5) **Daily living skills training** will support the acquisition of skills and capabilities to perform primary activities of daily life.
- (6) Education/vocation support services will be provided to promote regular attendance at school or work. When at all possible, the youth will continue to attend their home school. If this is not possible, then every effort will be made to acquire the students work from the home school for completion during their stay.
- (7) Health Services are activities designed to foster an increase in the youth's ability to demonstrate developmentally appropriate independence in personal health care and maintenance.
- (8) Medication management and training is intended to provide information to the youth and their family to ensure appropriate management of medication through understanding the role and effects of medication in treatment, identification of side effects of medication and discussion of potential dangers of consuming other substances while on medication. This service will be facilitated in coordination with the youth's current clinical provider.
- (9) Medication Monitoring are activities performed by staff which relates to storage, monitoring, recordkeeping and supervision associated with the use of medication. Such activities include reviewing the appropriateness of an existing regimen by staff with the prescribing physician. Prescribing medication is not an activity included under this service.
- (10) Socialization is intended to ensure that programming includes activities which assist in the development and practice of age-appropriate social and interpersonal skills. Such activities shall promote the capacity to identify and participate in positive social situations and to develop and practice appropriate communication skills.
