August 2016 Monthly Report:

OMH facility performance metrics and community service investments

Report Overview:

This report is issued pursuant to the State Fiscal Year 2016-17 Budget agreement which requires that "The commissioner of mental health shall provide monthly status reports of the 2016-17 community investments and the impact on inpatient census to Chairs of the Senate and Assembly fiscal committees. Such reports shall include state operated psychiatric facility census, admissions and discharges; rate of Medicaid psychiatric inpatient readmissions to any hospital within thirty days of discharge; Medicaid emergency room psychiatric visits; descriptions of 2016-17 new community service investments; average length of stay; and, number of long-term stay patients. Such reports shall include an explanation of any material census reductions, when known to the facility."

This report is comprised of several components:

- 1. State Psychiatric Center (PC) descriptive metrics;
- 2. Description and status of community service investments;
- 3. Psychiatric readmissions to hospitals and emergency rooms for State PC discharges;
- 4. Psychiatric readmissions to hospitals and emergency rooms for Article 28 and Article 31 hospital psychiatric unit discharges.

Statewide Overview of Service Expansion:

Utilization of services developed in 2014-15 and 2015-16 continued to grow through August, and some regions have begun planning to retool underutilized services developed in year one. Additionally, planning is underway for new and enhanced services to be developed with resources funded in the SFY 2016-17 Budget. Table 2 of this report displays the full annual investments available for SFY 2016-17 by program area, which this year includes: State-community FTEs, Aid to Localities, Supported Housing, Skilled Nursing Facility transition funds, and a residential stipend adjustment for targeted Supported Housing rate and SRO model adjustments to address funding gaps.

Supported housing continued developing and serving new individuals, with over 830 new individuals served with the expansion capacity through August. State Aid awards are pending in the Western, Central, and Hudson River regions for additional supported housing developed through 2016-17 SFY funds, and Requests for Proposals have been issued for Supported Housing units allocated to Long Island and New York City.

State-operated community services continue expanding their reach through eight facility service regions of the State. Statewide expansion has served 5,600 new individuals through August, as outlined in the accompanying tables. Programs funded through Aid to Localities pre-investment and Article 28 reinvestment resources continue with start-up and expansion of operations in several areas of the State, including mobile crisis, Assertive Community Treatment (ACT), and peer crisis respite services; 14,800 new individuals have been served in these programs through August.

Table 1: NYS OMH State Psychiatric Center Inpatient Descriptive Metrics for August, 2016

Updated as of Sep 8, 2016

Notes:

1. Research units and Sexual Offender Treatment Programs (SOTP) were excluded.

2. Capacity reductions comply with requirement that there be a consistent ninety day period of time that the beds remain vacant, as demonstrated by the June-August census data.

3. Discharge includes discharges to the community and transfers to another State IP facility.

4. Long Stay is defined as: Length of stay over one year for adult and forensic inpatients, and over 90 days for child inpatients.

5. Monthly Average Daily Census defined as: Total number of inpatient service days for a month divided by the total number of days in the month. Population totals displayed may differ from the sum of the facility monthly census values due to rounding.

Updated as of September 13, 2016

Notes:

1. Research units and Sexual Offender Treatment Programs (SOTP) were excluded.

2. Readmissions were defined as State PC and Medicaid (Article 28/31) psychiatric inpatient readmission events occurring within 1 to 30 days after the State PC discharge. The first readmission within the 30 days window was counted. The denominator for this measure was based on State inpatient discharges to the community. The discharge cohort has a 6-month lag to allow time for completion of Medicaid claim submissions. The discharges that were no longer qualified for Medicaid services (lost Medicaid eligibility, had Medicare or third party insurance) were excluded from the discharge cohort but who had a state operated service in the 3 months post discharge were retained in the discharge cohort.

3. ER utilization was identified using Medicaid claims and encounters only. The numerator included the first Psychiatric ER/CPEP event that occurred within thirty days post discharge. The denominator for this measure was based on State inpatient discharges to the community. The discharge cohort has a 6-month lag to allow time for completion of Medicaid claim submissions. The discharges that were no longer qualified for Medicaid services (lost Medicaid eligibility, had Medicare or third party insurance) were excluded from the discharge cohort.

4. The Medicaid system has had difficulty with the timely updating of managed care encounter data due to system transitions beginning in the fall of 2015. Therefore the Medicaid encounter data included in the rate calculations may not fully represent all managed care inpatient readmission or ER encounters during this reporting time period.

*Note this rate may not be stable due to small denominator (less than 20 discharges in the denominator).

Table 5: General and Private Hospital 30-Day Inpatient Readmission and ER Utilization Rates¹

Updated as of September 13, 2016

Source: Concerts, Medicaid, MHARS

Notes:

1. Private (Article 31) hospitals are classified as Institutes for Mental Diseases (IMD), and as such, are not reimbursed by Medicaid for inpatient treatment in their facilities for persons aged 22-64.

2. Data are presented by county of discharging hospital location and age group (child or adult). If an entity operates more than one hospital and county is not available on the records (e.g., managed care encounters), the discharges and readmissions are assigned to one of the hospitals.

3. Hospitals that closed prior to 8/1/2016 are excluded.

4. The denominators for the metrics were based on discharges to the community. The discharge cohort has a 6-month lag to allow time for completion of Medicaid claim submissions. The discharges that were no longer qualified for Medicaid services (lost Medicaid eligibility, had Medicare or third party insurance) were excluded from the discharge cohort.

5. Readmissions were defined as State PC and Medicaid psychiatric (Article 28 /31) inpatient events occurring within 1 to 30 days after the Article 28 /31 discharge. The readmission was only counted once.

6. When the psychiatric unit is a child or adolescent unit, persons aged 21 or younger are counted as a child. For adult units, persons aged 16 or older are counted as adults.

7. ER data were extracted from Medicaid claims and encounters only. The numerator included the first Psychiatric ER/CPEP event that occurred within thirty days post discharge.

8. Change at SUNY Health Science Center-University Hospital was made to reduce adult beds by 1 (from 50 to 49) effective on 6/13/2016.

9.The St. Joseph Medical Center adult capacity is expanded by 3 beds from 133 to 136 effective on 2/29/2016

10. Change at Kingsbrook Jewish Medical Center capacity is due to adding 3 Adult beds (from 55 to 58) effecive on 3/18/2016.

11. Changes at Long Island Jewish Medical Center child capacity is expanded by 1 bed from 21 to 22 effective on 3/18/2016 and updated on 4/19/2016

12. The Medicaid system has had difficulty with the timely updating of managed care encounter data due to system transitions beginning in the fall of 2015. Therefore the Medicaid encounter data included in the rate calculations may not fully represent all managed care inpatient readmission or ER encounters during this reporting time period.

*Note: This rate may not be stable due to small denominator (less than 20 discharges in the denominator).

Glossary of Services

1. Supported Housing: Supported Housing is a category of community-based housing that is designed to ensure that individuals who are seriously and persistently mentally ill (SPMI) may exercise their right to choose where they are going to live, taking into consideration the recipient's functional skills, the range of affordable housing options available in the area under consideration, and the type and extent of services and resources that recipients require to maintain their residence with the community. Supported Housing is not as much considered a "program" which is designed to develop a specific number of beds; but rather, it is an approach to creating housing opportunities for people through the development of a range of housing options, community support services, rental stipends, and recipient specific advocacy and brokering. As such, this model encompasses community support and psychiatric rehabilitation approaches.

The unifying principle of Supported Housing is that individual options in choosing preferred long term housing must be enhanced through:

- Increasing the number of affordable options available to recipients;
- Ensuring the provision of community supports necessary to assist recipients in succeeding in their preferred housing and to meaningfully integrate recipients into the community; and
- Separating housing from support services by assisting the resident to remain in the housing of his choice while the type and intensity of services vary to meet the changing needs of the individual.
- 2. Home and Community Based Services Waiver (HCBS): HCBS was developed as a response to experience and learning gained from other state and national grant initiatives. The goals of the HCBS waiver are to:
 - Enable children to remain at home, and/or in the community, thus decreasing institutional placement.
 - Use the Individualized Care approach to service planning, delivery and evaluation. This approach is based on a full partnership between family members and service providers. Service plans focus upon the unique needs of each child and builds upon the strengths of the family unit.
 - Expand funding and service options currently available to children and adolescents with a diagnosis of serious emotional disturbance and their families.
 - Provide services that promote better outcomes and are cost-effective.

The target population of children eligible for the waiver are children with a diagnosis of serious emotional disturbance who without access to the waiver would be in psychiatric institutional placement. Parent income and resources are not considered in determining a child's eligibility.

The HCBS waiver includes six new services not otherwise available in Medicaid:

• Individualized Care Coordination includes the components of intake and screening, assessment of needs, service plan development, linking, advocacy, monitoring and consultation.

- Crisis Response Services are activities aimed at stabilizing occurrences of child/family crisis where it arises.
- **Intensive In-home Services** are ongoing activities aimed at providing intensive interventions in the home when a crisis response service is not enough.
- **Respite Care** are activities that provide a needed break for the family and the child to ease the stress at home and improve family harmony.
- **Family Support Services** are activities designed to enhance the ability of the child to function as part of a family unit and to increase the family's ability to care for the child in the home and in community based settings.
- **Skill Building Services** are activities designed to assist the child in acquiring, developing and addressing functional skills and support, both social and environmental.
- 3. Mobile Integration Teams (MIT): Mobile Integration Teams provide an array of services delivered by multidisciplinary professionals and paraprofessionals to successfully maintain each person in his or her home or community. The intent of this program is to address the social, emotional, behavioral and mental health needs of the recipients and their families to prevent an individual from needing psychiatric hospitalization. Examples of services include, but are not limited to, health teaching, assessment, skill building, psychiatric rehabilitation and recovery support, in-home respite, peer support, parent support and skills groups, crisis services, linkage and referral, outreach and engagement. The population to be served includes children and adolescents, their families, and adults. The services provided by this team can be provided in any setting, including an individual's residence, schools, as well as inpatient or outpatient treatment settings.
- 4. Respite Services: Temporary services (not beds) provided by trained staff in the consumer's place of residence or other temporary housing arrangement. Includes custodial care for a disabled person in order that primary care givers (family or legal guardian) may have relief from care responsibilities. The purpose of respite services is to provide relief to the primary care provider, allow situations to stabilize and prevent hospitalizations and/or longer term placements out of the home. Maximum Respite Care services per Consumer per year are 14 days.
- 5. Outreach: Outreach programs/services are intended to engage and/or assess individuals potentially in need of mental health services. Outreach programs/services are not crisis services. Examples of applicable services are socialization, recreation, light meals, and provision of information about mental health and social services. Another type of service within this program code includes off-site, community based assessment and screening services. These services can be provided at forensic sites, a consumer's home, other residential settings, including homeless shelters, and the streets.
- 6. Assertive Community Treatment (ACT) Program: ACT Teams provide mobile intensive treatment and support to people with psychiatric disabilities. The focus is on the improvement of an individual's quality of life in the community and reducing the need for inpatient care, by providing intense community-based treatment services by an interdisciplinary team of mental health professionals. Building on the successful components of the Intensive Case Management (ICM) program, the ACT program has low staff-outpatient ratios; 24-hour-a-day, seven-day-perweek availability; enrollment of consumers, and flexible service dollars. Treatment is focused on individuals who have been unsuccessful in traditional forms of treatment.
- 7. Advocacy/Support Services: Advocacy/support services may be individual advocacy or systems advocacy (or a combination of both). Examples are warm lines, hot lines, teaching daily

living skills, providing representative payee services, and training in any aspect of mental health services. Individual advocacy assists consumers in protecting and promoting their rights, resolving complaints and grievances, and accessing services and supports of their choice. Systems advocacy represent the concerns of a class of consumers by identifying patterns of problems and complaints and working with program or system administrators to resolve or eliminate these problems on a systemic, rather than individual basis.

8. Targeted Case Management: The Targeted Case Management (TCM) program promotes optimal health and wellness for adults diagnosed with severe mental illness, and children and youth diagnosed with severe emotional disorders. Wellness and recovery goals are attained by implementing a person-centered approach to service delivery and ensuring linkages to and coordination of essential community resources. With respect for and affirmation of recipients' personal choices, case managers foster hope where there was little before. Case Managers work in partnership with recipients to advance the process of individuals gaining control over their lives and expanding opportunities for engagement in their communities. All targeted case management programs are organized around goals aimed at providing access to services that encourage people to resolve problems that interfere with their attainment or maintenance of independence or self-sufficiency, and maintain themselves in the community rather than an institution.

Case managers:

- Promote hope and recovery by using strengths-based, culturally appropriate, and personcentered practices
- Maximize community integration and normalization
- Provide leadership in ensuring the coordination of resources for individuals eligible for mental health services
- 9. Intensive Case Management (ICM): In addition to providing the services in the general Targeted Case Management program description above, ICM is set at a case manager/client ratio of 1:12. Medicaid billing requirements for the Traditional ICM model requires a minimum of four (4) 15 minute face to-face contacts per individual per month. For programs serving Children and Families, one contact may be collateral. The Flexible ICM model requires a minimum of two (2) 15 minute minimum face-to-face contacts per individual, per month but must maintain a minimum aggregate of 4 face-to-face contacts over the entire caseload. For programs serving Children and Families, 25% of the aggregate contacts can be collaterals.

*Note: Targeted Case Management and Intensive Case Management programs for adults have been converted to Health Home care management. Children will continue to be served under the ICM program until the conversion to Health Home in 2015.

- 10. Crisis Intervention: Crisis intervention services, applicable to adults, children and adolescents, are intended to reduce acute symptoms and restore individuals to pre-crisis levels of functioning. Examples of where these services may be provided include emergency rooms and residential settings. Provision of services may also be provided by a mobile treatment team, generally at a consumer's residence or other natural setting (not at an in-patient or outpatient treatment setting). Examples of services are screening, assessment, stabilization, triage, and/or referral to an appropriate program or programs. This program type does not include warm lines or hot lines.
- 11. Non-Medicaid Care Coordination: Activities aimed at linking the consumer to the service system and at coordinating the various services in order to achieve a successful outcome. The objective of care coordination in a mental health system is continuity of care and service. Services may include linking, monitoring and case-specific advocacy. Care Coordination Services are provided to enrolled consumers for whom staff is assigned a continuing care coordination

responsibility. Thus, routine referral would not be included unless the staff member making the referral retains a continuing active responsibility for the consumer throughout the system of service. Persons with Medicaid may receive services from this program, however the program does not receive reimbursement from Medicaid.

- 12. Recovery Center: A program of peer support activities that are designed to help individuals with psychiatric diagnosis live, work and fully participate in communities. These activities are based on the principle that people who share a common condition or experience can be of substantial assistance to each other. Specific program activities will: build on existing best practices in self-help/peer support/mutual support; incorporate the principles of Olmstead; assist individuals in identifying, remembering or discovering their own passions in life; serve as a clearinghouse of community participation opportunities; and then support individuals in linking to those community groups, organizations, networks or places that will nurture and feed an individual's passions in life. Social recreation events with a focus on community participation opportunities will be the basis for exposing individuals to potential passion areas through dynamic experiences, not lectures or presentations.
- **13. Self Help Program:** To provide rehabilitative and support activities based on the principle that people who share a common condition or experience can be of substantial assistance to each other. These programs may take the form of mutual support groups and networks, or they may be more formal self-help organizations that offer specific educational, recreational, social or other program opportunities.
- 14. Clinic Treatment: A clinic treatment program shall provide treatment designed to minimize the symptoms and adverse effects of illness, maximize wellness, and promote recovery. A clinic treatment program for adults shall provide the following services: outreach, initial assessment (including health screening), psychiatric assessment, crisis intervention, injectable psychotropic medication administration (for clinics serving adults), psychotropic medication treatment, psychotherapy services, family/collateral psychotherapy, group psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, psychological testing, health physicals, health monitoring, and psychiatric consultation. A clinic treatment program for children shall provide the following services: outreach, initial assessment (including health screening), psychiatric assessment, crisis intervention, psychotropic medication treatment (including health screening), psychiatric assessment, crisis intervention, psychotropic medication treatment, psychotherapy services, family/collateral psychotherapy, group psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, the following optional services may also be provided: developmental testing, psychotherapy services, family/collateral psychotherapy, group psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, psychological testing, health physicals, health monitoring, psychotherapy, and complex care management. The following optional services may also be provided: developmental testing, psychological testing, health physicals, health monitoring, psychiatric consultation, and injectable psychotropic medication administration.
- **15. Home-Based Crisis Intervention:** The Home-Based Crisis Intervention Program is a clinically oriented program with support services by a MSW or Psychiatric Consultant which assists families with children in crisis by providing an alternative to hospitalization. Families are helped through crisis with intense interventions and the teaching of new effective parenting skills. The overall goal of the program is to provide short-term, intensive in-home crisis intervention services to a family in crisis due to the imminent risk of their child being admitted to a psychiatric hospital. The target population for the HBCI Program is families with a child or adolescent ages 5 to 17 years of age, who are experiencing a psychiatric crisis so severe that unless immediate, effective intervention is provided, the child will be removed from the home and admitted to a psychiatric hospital. Families referred to the program are expected to come from psychiatric emergency services.

- **16.** Crisis Housing/Beds (Adult): Non-licensed residential program, or dedicated beds in a licensed program, which provide consumers a homelike environment with room, board and supervision in cases where individuals must be removed temporarily from their usual residence.
- **17. Children & Youth Crisis/Respite:** The intent of the crisis/respite program is to provide a short-term, trauma-sensitive, safe and therapeutic living environment, and crisis support to children and adolescents with serious emotional disturbances, their families and residential service providers.

The goal of the program is to:

- Stabilize the crisis situation and support the family or service provider's efforts to maintain the child in his or her current residence;
- Provide immediate access to treatment services;
- Increase engagement with peer and family support services;
- Improve the family/caregiver's ability to respond to the environmental/social stressors that
 precipitated the need for respite; and
- Decrease the inappropriate use of emergency departments, inpatient hospitalizations and/or other out-of-home placements.

This program is intended to be an opportunity to provide intense support and guidance to the youth and their family/caregivers so as to prevent a reoccurrence of the situation preceding the admission.

Eligibility

Depending upon the facility and/or location of the program, the population to be served may include youth from five to eighteen years of age, with admission happening prior to the youth's eighteenth birthday.

A crisis admission to the crisis/respite unit may occur when there is evidence of situational crisis requiring temporary residential placement for assessment and treatment planning due to one or more of the following:

- A situational crisis occurred disturbing the adolescent's ability to cope;
- Substantial problems in social functioning due to a serious emotional disturbance within the past year;
- Serious problems in family relationships, peer/social interaction or school performance;
- Serious and persistent symptoms of cognitive, affective and personality disorders.

A planned respite admission will occur for youth in active mental health treatment, whose service providers believe that planned time away for the living situation would significantly relieve stress and allow time for parents and providers to re-strategize, which in turn will keep youth out of hospitals and long term residential placements.

Services Provided

The following services will be provided and/or coordinated through the crisis/respite program:

- (1) **Crisis Stabilization** is intended to address the situation that precipitated the youth's admission to the program.
- (2) **Behavior support** services will provide guidance and training in behavior intervention techniques and opportunities to practice those skills to increase the youth's ability to manage their behavior. These interventions will be primarily focused in the areas that were the catalyst for the youth's admission.

- (3) Case management services will be provided, if appropriate. If the youth and family are already connected to case management services (SCM, ICM, Waiver), this service will continue to be provided by the involved provider. If the youth/family is not connected to case management services, a referral for such services will be submitted, where appropriate.
- (4) Counseling services will be provided with a focus on clarifying future direction, developing meaningful goals, identifying personal strengths, identifying mental healthrelated behaviors or feelings that assist or interfere with the achievement of goals, and re-integrating into the community.
- (5) **Daily living skills training** will support the acquisition of skills and capabilities to perform primary activities of daily life.
- (6) **Education/vocation support services** will be provided to promote regular attendance at school or work. When at all possible, the youth will continue to attend their home school. If this is not possible, then every effort will be made to acquire the students work from the home school for completion during their stay.
- (7) **Health Services** are activities designed to foster an increase in the youth's ability to demonstrate developmentally appropriate independence in personal health care and maintenance.
- (8) Medication management and training is intended to provide information to the youth and their family to ensure appropriate management of medication through understanding the role and effects of medication in treatment, identification of side effects of medication and discussion of potential dangers of consuming other substances while on medication. This service will be facilitated in coordination with the youth's current clinical provider.
- (9) **Medication Monitoring** are activities performed by staff which relates to storage, monitoring, recordkeeping and supervision associated with the use of medication. Such activities include reviewing the appropriateness of an existing regimen by staff with the prescribing physician. Prescribing medication is not an activity included under this service.
- (10) **Socialization** is intended to ensure that programming includes activities which assist in the development and practice of age-appropriate social and interpersonal skills. Such activities shall promote the capacity to identify and participate in positive social situations and to develop and practice appropriate communication skills.
- **18. Transportation:** The provision of transportation to and from facilities or resources specified in the Consumer's individual treatment plan as a necessary part of his/her service for mental disability. This includes all necessary supportive services for full and effective integration of the Consumer into community life.
- 19. Flexible Recipient Service Dollars: Flexible Recipient Service Dollars are not based on a particular fiscal model and are available to provide for a recipient's emergency and non-emergency needs. These funds are to be used as payment of last resort. The use of the service dollars should include participation of the recipient of services, who should play a significant role in the planning for, and the utilization of, service dollars. Services purchased on behalf of a recipient, such as Respite or Crisis Services, should be reported using this Service Dollar program code. Examples of services may include housing, food, clothing, utilities, transportation and assistance in educational, vocational, social or recreational and fitness activities, security deposits, respite, medical care, crisis specialist, homemakers and escorts. This program code cannot be allocated for AHSCM, ICM, SCM, BCM, ACT, RTF Transition Coordinators or Home and Community Based Waiver Services. Agency administrative costs allocated to the operating

costs of this program via the Ratio Value allocation methodology are redistributed to other OMH programs in the CFR.

- **20. Family Support Services:** Family support programs provide an array of formal and informal services to support and empower families with children and adolescents having serious emotional disturbances. The goal of family support is to reduce family stress and enhance each family's ability to care for their child. To do this, family support programs operate on the principles of individualized care and recognizing every child and family is unique in their strengths and needs. Connecting family members to other families with children with serious emotional problems helps families to feel less isolated and identify their own strengths. Family support programs ideally provide the following four core services: family/peer support, respite, advocacy, and skill building/educational opportunities.
- 21. CPEP Crisis Intervention: This licensed, hospital-based psychiatric emergency program establishes a primary entry point to the mental health system for individuals who may be mentally ill to receive emergency observation, evaluation, care and treatment in a safe and comfortable environment. Emergency visit services include provision of triage and screening, assessment, treatment, stabilization and referral or diversion to an appropriate program. Brief emergency visits require a psychiatric diagnostic examination and may result in further CPEP evaluation or treatment activities, or discharge from the CPEP program. Full emergency visits, which result in a CPEP admission and treatment plan, must include a psychiatric diagnostic examination, psychosocial assessment and medication examination. Brief and full emergency visit services are Medicaid reimbursable. CPEP Crisis Intervention is one of four program components which, when provided together, form the OMH licensed Comprehensive Psychiatric Emergency Program (CPEP), and the code to which the license is issued. The other program components of the CPEP are: CPEP Extended Observation Beds (1920), CPEP Crisis Outreach (1680) and CPEP Crisis Beds (2600).
- 22. Collaborative Problem Solving: Collaborative Problem Solving (CPS) is an evidence-based approach to working "with children and adolescents with a wide range of social, emotional, and behavioral challenges across a variety of different settings: from families, schools, mentoring organizations and foster care agencies to therapeutic programs such as inpatient psychiatry units, residential treatment and juvenile detention facilities. This evidence based model has also been applied in transitional age youth and adult programs as well as used with neurotypically developing kids to foster the development of social emotional skills. CPS is a strengths-based, neurobiologically-grounded approach that provides concrete guideposts so as to operationalize trauma-informed care and empower youth and family voice." (from http://thinkkids.org/learn/our-collaborative-problem-solving-approach/)
- **23. First Episode Psychosis:** First Episode Psychosis (FEP) programs are intended for early identification of psychotic symptoms and the development of early intervention strategies to mitigate the onset of psychotic disorders. These programs generally focus on serving transition-aged youth and young adults experiencing their first psychotic break.
- 24. First Break Team: The First Break Teams provides services to the first onset psychosis adult population. The purpose of this program will be to provide interventions that will prevent the need for an inpatient hospitalization for those individuals experiencing their first psychotic break.
- **25. On-Site Rehabilitation:** Program objective is to assist mentally ill adults living in adult congregate care settings, supervised or supported living arrangements to achieve their treatment and community living rehabilitation goals. Services include one or a combination of:
 - (1) consumer self-help and support interventions:
 - (2) community living;
 - (3) academic and/or social leisure time rehabilitation training and support services.

Services are provided either at the residential location of the resident or in the natural or provideroperated community and are provided by a team that is either located at the residential site or which functions as a mobile rehabilitation team traveling from site to site.

26. Transitions in Care Teams: Transitions in Care Teams focused on State PC and acute care discharges. OMH is funding two types of transitions in care teams known as the Pathway Home (3) and Parachute teams (3), for a total of 6 teams, largely focused on assisting recipients in the transition from a State Psychiatric Center to a community setting. These teams will become a critical part of the crisis management system in the City. Although largely focused on State PC discharges, these teams can also be used as a bridge service for individuals being discharged from an acute care hospital as a way to provide more intensive support while a recipient is being engaged in outpatient clinic and other services.

Both teams are focused on recipient engagement through a multi-disciplinary mobile team consisting of peer specialists and nurses, social workers and part-time physician staff and have as their goal the collaboration with treatment and housing providers to facilitate timely, safe discharge to the community with ongoing support. Although run by different providers, the basic aim is similar – providing time-limited support in transitions in care to prevent future crises, and costly inpatient and psychiatric emergency services use. The team support is very patient-centered and depending on the recipient's needs can extend from three months to a year.

- 27. Family Resource Centers: Family Resource Centers aim to strengthen secure attachment between parent and child relationships, and to promote healthy social-emotional development in children age five and under from high risk families residing in 8 communities in the Bronx and Harlem.
- **28. High Fidelity Wraparound (HFW)** is a youth-guided, family-driven planning process that allows youth and their family achieve treatment goals that they have identified and prioritized, with assistance from their natural supports and system providers, while the youth remains in his or her home and community setting.
- **29. Mobile Residential Support Team:** focus on transitioning adults living in supported housing apartments into community living. Once these individuals are living in the community, the Mobile Residential Support Teams visit them in their homes to help ensure that their basic needs are being met. Teams assist with discharge and community residential support for high risk individuals (e.g., those with co-morbid medical conditions and dual diagnoses of mental illness and developmental disability).
